KOUDIJS MKORMA

Improve the technical and economic performance of your business with the FARM SOLUTIONS concept!

1

AUDIT

The first stage of the Farm Solutions concept is a full-scale audit of your business. Based on the data obtained, we thoroughly explore and analyze all aspects of your business .

2

CONSULTING

The results of the study allow us to identify all factors affecting animal health and offer you personalized recommendations. Our main goal is to preserve and maintain the health of your livestock by continually improving their productivity.

Our specialists' recommendations include:

- maintenance and feeding strategy for farm animals and poultry;
- microclimate strategy;
- optimization of the production management processes.

We perfectly combine all the components of a compound feed, improving the results of your enterprise and, as a result, improving its performance as a whole.

3

SOLUTIONS

FARM SOLUTIONS is a comprehensive approach which allows you to maximise the value of your finished product in a sustainable way.

Each enterprise is unique and requires an individual approach.
That's why working with our partner starts with a highly effective diagnosis: we analyze the condition of the animals, take into account the goals of the enterprise and the requirements of the finished product.
Then we determine the exact nutrient requirements and develop the eficcient feeding strategy.

UNIQUE KNOWLEDGE AND YEARS OF EXPERIENCE

«Koudijs MKorma» is Russia's No.1 premix company, a leading producer of pre-starters, feeds and premium feed complexes, as well as the largest supplier of feed additives. Constant forward movement, dynamic development and readiness to improve are the inherent qualities of our company, thanks to which we have remained the market leader for more than 30 years, maintaining our reputation as a reliable supplier and honest business partner.

FARM SOLUTIONS concept: we offer more than just a product - we offer solutions for your business.

Every business is unique. We will help you find customised solutions for the successful development.

Precise identification of nutrient requirements is the basis for an efficient feeding strategy
